COURSE TITLE: INFECTION CONTROL AND ITS PREVENTION

AIM:

The course aims to provide healthcare professionals with comprehensive knowledge and skills to effectively prevent and control infections in hospital settings, ensuring patient safety, enhancing healthcare quality, and reducing healthcare-associated infections (HAIs).

COURSE OBJECTIVES:

1. To understand the principles of infection prevention and control in healthcare settings.
2. To identify common pathogens and modes of transmission in hospitals.
3. To learn about standard precautions, including hand hygiene, personal protective equipment (PPE), and environmental cleaning.
4. To develop skills in implementing infection control protocols and guidelines.

COURSE OUTCOMES:

Upon completion of this course, participants will be able to:

1. Describe the principles and importance of infection control in hospitals.
2. Identify common sources and transmission routes of healthcare-associated infections.
3. Implement standard and transmission-based precautions to prevent infections.
4. Demonstrate proper techniques for hand hygiene, use of PPE, and safe injection practices.

INFECTION CONTROL & ITS PREVENTION IN HOSPITAL

PRETEST/ POST TEST QUESTIONNAIRE

1.Which of the following is the most effective way to prevent the spread of infections in a hospital setting?

A. Using hand sanitizer before patient contact

B. Wearing gloves for all patient interactions

C. Performing hand hygiene with soap and water

D. Using antiseptic wipes on surfaces

2. What is the primary purpose of Standard Precautions in infection control?

A. To protect the patient from healthcare-associated infections

B. To protect healthcare workers from exposure to infectious agents

C. To limit the use of antibiotics in the hospital

D. To ensure all patients receive the same level of care

3. Which of the following is NOT a component of personal protective equipment (PPE) used in infection control?

A. Surgical mask

B. Gown

C. Safety goggles

D. Surgical scrub

4. When should a nurse perform hand hygiene according to infection control guidelines?

A. Only after using the restroom

B. Before and after patient contact, and after handling potentially contaminated items

C. Only after handling blood or body fluids

COURSE TITLE: UNDERSTANDING THE POWER OF SELF

AIM:

The course aims to empower individuals by helping them explore their inner strengths, enhance self-awareness, and develop a positive mindset, enabling them to achieve personal and professional growth.

COURSE OBJECTIVES:

1. To enhance self-awareness and understanding of personal values, beliefs, and strengths.
2. To develop skills for self-reflection, emotional intelligence, and self-regulation.
3. To explore techniques for building self-confidence and self-esteem.
4. To understand the impact of mindset on personal and professional success.

COURSE OUTCOMES:

Upon completion of this course, participants will be able to:

1. Recognize their personal strengths and areas for improvement through self-reflection.
2. Demonstrate improved self-awareness and emotional intelligence in daily interactions.
3. Apply techniques to enhance self-confidence and build a positive self-image.
4. Develop strategies to manage stress, anxiety, and self-doubt.

UNDERSTANDING THE POWER OF SELF
PRETEST/ POST TEST QUESTIONNAIRE

1.What is the primary benefit of self-awareness for a nurse?

A) Improved technical skills

B) Enhanced communication with patients

C) Increased work hours

D) Higher salary

2.Which of the following best describes self-care in nursing?

A) Delegating tasks to others

B) Avoiding personal issues at work

C) Actively managing one's own physical, emotional, and mental well-being

D) Working longer hours

3.How does self-reflection contribute to professional growth in nursing?

A) By increasing technical knowledge

B) By allowing nurses to analyze and improve their own practice

C) By reducing patient contact

D) By focusing on external validation

4.Which of the following is an example of setting professional boundaries in nursing?

A) Staying late to finish paperwork without pay

B) Sharing personal problems with patients to build rapport

COURSE TITLE: COMPUTER PROFICIENCY FOR NURSES

AIM:

To equip nursing professionals with essential computer skills that enhance clinical practice, administrative efficiency, and improve patient care through the effective use of technology.

COURSE OBJECTIVES:

1. To provide foundational knowledge of computer operations and software applications used in healthcare settings.
2. To develop skills in data management, including data entry, retrieval, and reporting.
3. To enhance nurses' ability to use technology for patient education and healthcare promotion.
4. To promote cybersecurity awareness and safe handling of patient information.

COURSE OUTCOMES:

Upon successful completion of this course, participants will be able to:

1. Demonstrate basic computer operation skills, including word processing, spreadsheets, and presentations.
2. Apply data management skills for patient records and reporting.
3. Utilize digital communication tools such as email, video conferencing, and messaging platforms in a professional context.
4. Use technology to educate patients on health-related issues effectively.

COMPUTER PROFICIENCY FOR STAFF NURSES
PRETEST/POST TEST QUESTIONNAIRE

1.Which of the following software applications is commonly used for electronic health records (EHR) in hospitals?

A) Microsoft Word

B) Adobe Photoshop

C) Epic Systems

D) Google Sheets

2. When creating a patient report in a word processing application, what is the most appropriate format to save the document for sharing with other healthcare professionals?

A) .txt

B) .docx

C) .csv

D) .html

3. Which of the following is a secure method for transmitting patient information via email?

A) Sending an unencrypted email

B) Using a password-protected attachment

C) Sending through personal email accounts

D) Posting on social media

4.In a spreadsheet application, which formula would you use to calculate the total number of patient visits listed in a column?

COURSE TITLE: RADIATION HAZARDS AND SAFETY

AIM:

To equip nurses with the knowledge and skills necessary to understand radiation hazards and implement safety measures in clinical settings, ensuring the protection of patients, healthcare workers, and the environment.

COURSE OBJECTIVES:

1. To provide an understanding of the fundamental principles of radiation, including types, sources, and uses in healthcare.
2. To familiarize nurses with radiation protection principles, standards, and regulatory guidelines.
3. To teach effective safety protocols and procedures to minimize radiation exposure to patients and healthcare personnel.
4. To prepare nurses for emergency situations involving radiation exposure or contamination.

COURSE OUTCOMES:

Upon successful completion of this course, nurses will be able to:

1. Demonstrate an understanding of the principles of radiation and its clinical applications.
2. Identify common sources of radiation exposure in healthcare settings.
3. Adhere to legal and institutional guidelines related to radiation protection.
4. Implement appropriate safety measures in various clinical situations involving radiation.

VALUE ADDED COURSE

RADIATION HAZARDS AND SAFETY

COURSE CONTENT

S.NO	DURATION	CONTENT	TEACHING & LEARNING ACTIVITIES
1.	2 hours	**INTRODUCTION TO RADIATION** • Definition and Types of Radiation (Ionizing vs. Non-Ionizing) • Sources of Radiation in Healthcare (X-rays, CT, Nuclear Medicine) • Uses of Radiation in Diagnostics and Therapy	Lecture Method
2	2 hours	**RADIATION HAZARDS** • Biological Effects of Radiation on Human Tissue • Acute and Chronic Radiation Exposure • Radiation Sensitivity of Different Organs	Lecture Method
3	2 hours	**RADIATION PROTECTION PRINCIPLES** • ALARA Principle (As Low As Reasonably Achievable) • Time, Distance, and Shielding Concepts • Personal Protective Equipment (PPE) for Radiation Safety	Interactive learning
4	2 hours	**REGULATORY GUIDELINES AND STANDARDS** • Overview of Regulatory Bodies (e.g., ICRP, NCRP, AERB) • National and International Radiation Safety Standards • Legal Responsibilities of Healthcare Workers	Discussion
5	2 hours	**RADIATION SAFETY IN CLINICAL PRACTICE** • Radiation Safety in Diagnostic Imaging (X-ray,	Simulation

Principal
SREE NARAYANA NURSING COLLEGE
Chintharedypalem,
NELLORE-524 002

		CT, Fluoroscopy) • Radiation Safety in Radiotherapy and Nuclear Medicine • Handling and Disposal of Radioactive Materials	
6	2 hours	**EMERGENCY PREPAREDNESS AND INCIDENT RESPONSE** • Managing Radiation Accidents and Spills • Decontamination Procedures for Patients and Staff • Post-exposure Monitoring and Reporting Protocols	Demonstration
7	2 hours	**PATIENT AND PUBLIC EDUCATION** • Communicating Radiation Risks to Patients • Educating Patients on Safety Precautions • Addressing Common Myths and Misconceptions	Discussion
8	2 hours	**PRACTICAL SESSION AND CASE STUDIES** • Demonstration of Safety Equipment Use • Simulation of Radiation Hazard Scenarios • Case Studies on Radiation Incidents and Best Practices	Roleplay

RADIATION HAZARDS AND SAFETY

1. **What is the primary source of radiation exposure for healthcare workers?**

   A) Environmental background radiation

   B) Radiographic procedures

   C) Patient care activities

   D) Laboratory testing

2. **Which of the following best describes the ALARA principle?**

   A) Always limit access to radiation areas

   B) As low as reasonably achievable

   C) Always maintain adequate radiology staffing

   D) Active learning and risk assessment

3. **What is the recommended distance a nurse should maintain from a radiation source during procedures?**

   A) 1 meter

   B) 3 feet

   C) 6 feet

   D) As far as possible

4. **What type of personal protective equipment (PPE) is commonly used to shield against radiation?**

   A) Surgical masks

   B) Lead aprons

   C) N95 respirators

   D) Isolation gowns

5. **Which of the following is a common symptom of acute radiation syndrome?**

   A) Headache

   B) Nausea and vomiting

   C) Fatigue

   D) Skin rash

6. **What is the primary purpose of dosimeters worn by healthcare workers?**

   A) To measure patient exposure

   B) To measure environmental radiation levels

   C) To monitor personal radiation exposure

   D) To ensure proper radiation equipment function

7. **Which of the following actions can reduce radiation exposure during x-ray procedures?**

   A) Increasing the duration of exposure

   B) Using lead shields on patients

   C) Holding patients during the procedure

   D) Reducing the distance from the source

8. **What is the maximum allowable annual dose of radiation for a radiation worker, according to safety guidelines?**

   A) 1 mSv

   B) 20 mSv

   C) 50 mSv

   D) 100 mSv

9. **In which situation should a nurse prioritize using a lead apron?**

   A) When administering oral medications

   B) During patient transport

   C) When assisting with a fluoroscopy procedure

   D) During routine vital sign checks

10. **Which group is at the highest risk for radiation exposure in a healthcare setting?**

    A) Administrative staff

    B) Nursing staff

    C) Maintenance workers

    D) Radiologic technologists

COURSE TITLE: QUALITY MANAGEMENT IN NURSING

AIM:

The course aims to equip nursing professionals with the knowledge and skills required to implement and manage quality improvement processes in healthcare settings, ensuring patient safety, enhanced care delivery, and compliance with healthcare standards.

COURSE OBJECTIVES:

1. To understand the principles and concepts of quality management in nursing.
2. To develop skills in identifying and analysing quality improvement opportunities in healthcare.
3. To learn about various quality management tools and techniques applicable to nursing practice.
4. To enhance leadership skills in managing quality improvement initiatives within healthcare teams.

COURSE OUTCOMES:

Upon completion of this course, students will be able to:

1. Explain the principles of quality management and their application in nursing.
2. Identify areas of improvement in nursing care and propose appropriate quality improvement measures.
3. Utilize various quality management tools, such as PDCA (Plan-Do-Check-Act), root cause analysis, and Six Sigma, in nursing practice.
4. Develop strategies to enhance patient safety and satisfaction through quality management.
